

# Community Plan Service Framework.

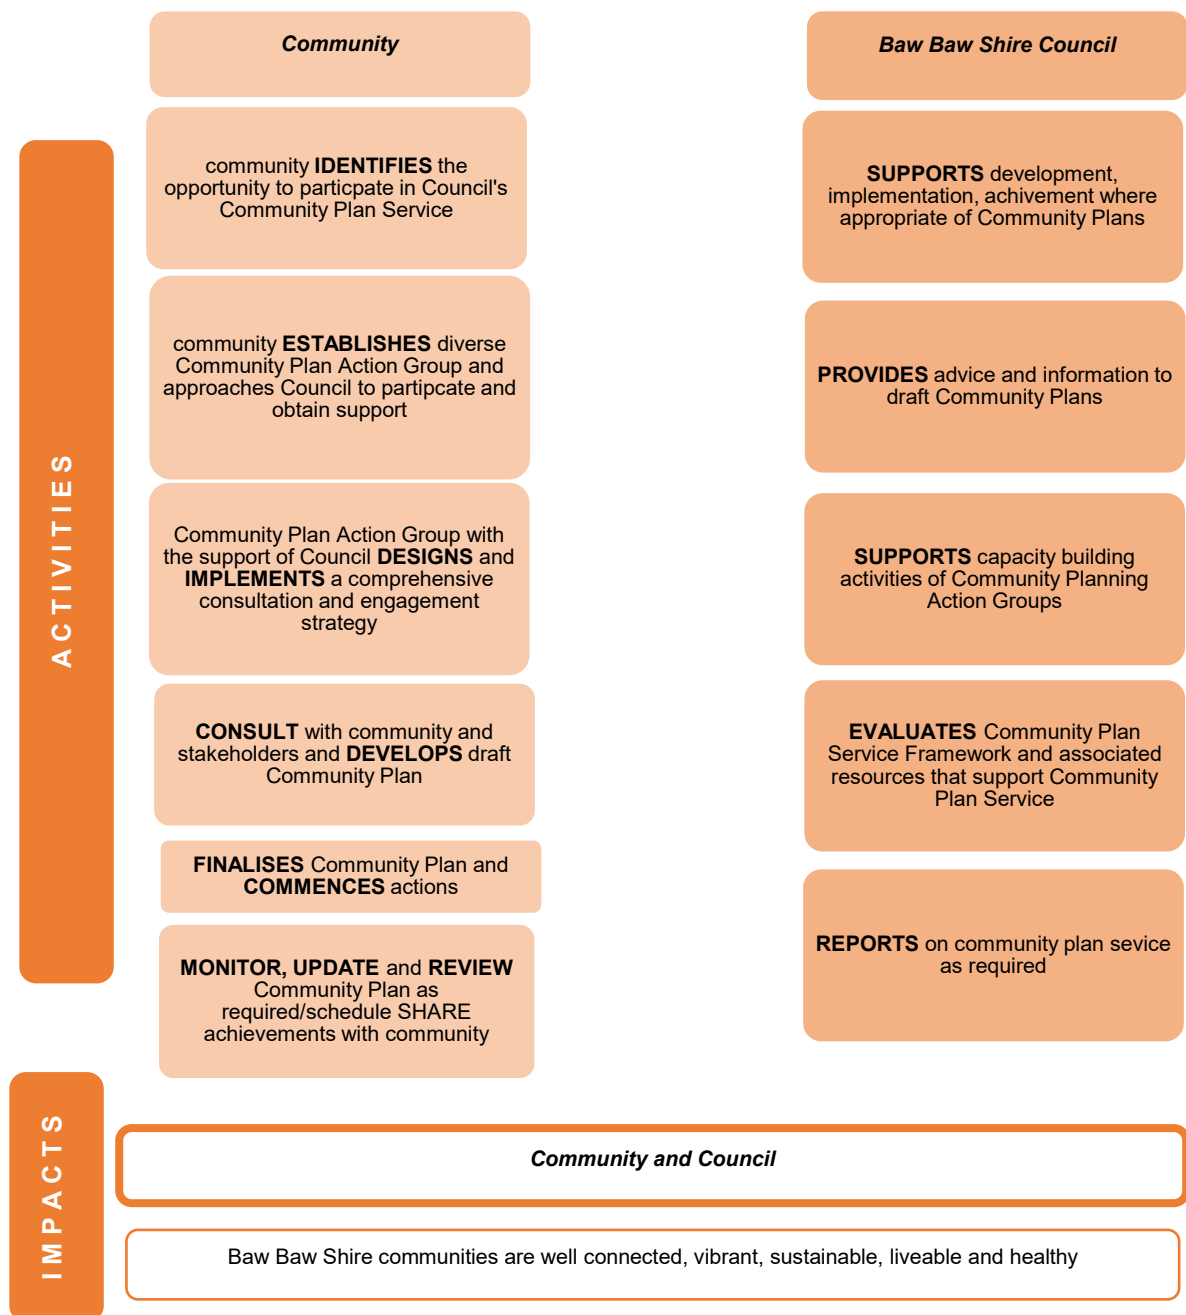

Helping communities drive their vision for their town.

## What is a Community Plan?

A Community Plan is a local plan that enables a community to identify its values, vision and aspirations and develop an action plan that describes the priorities the community are committed to working towards. Community Plans can be specific to one community or represent a number of communities that want to work together. Community Plans can help promote a more connected, vibrant, sustainable, liveable and healthy community.

Developing and implementing a Community Plan is the responsibility of a community, with support from Council where relevant. To assist in understanding these roles and responsibilities, Baw Baw Shire Council has a **Community Plan Service Framework**.
