

Fire Hazard Clearance Commercial Contractors

The provision of this list is to assist property owners or occupiers who are subject to a Fire Prevention Notice for the 2020/2021 Fire Danger Period.

Please note: Baw Baw Shire Council does not recommend any particular operator and takes no responsibility, nor accepts any liability for activities arising from any operator engaged by any property owner.

Property owners engage operators at their own risk.

The following private operators have indicated to Baw Baw Shire Council their interest in undertaking fuel reduction works on private property. Please note;

- This is not an exhaustive list and property owners may choose to engage through any other means.
- Not all operators listed will provide services required across the entire Shire.
- The onus is on the property owner/s or occupier/s to ensure compliance with the Fire Prevention Notice, not the operator.
- Summer is a particularly busy time for some of the operators and it may be difficult to obtain services at short notice.

Baw Baw Shire Council strongly recommends that any operator you engage has their own Public Liability Insurance.
