Lesson Information

The YMCA Learn to Swim program offers qualified and experienced AUSTSWIM instructors teaching both swimming and water safety skills to all age groups:

Infants (from 6 months to 3 years)

A parent supports the child in the pool, while they learn to explore and become familiar with the water, and help build confidence. Children learn to control breathing, floating, paddling and propulsion.

Pre-school (3 years to school age)

Children grow in confidence and become more independent in the water. Parents are gradually transitioned out of the pool and children start to participate on their own. Children start to learn swimming strokes.

School Aged

With an increase in confidence, competence and endurance, children establish a lifelong appreciation for safer activity in the water. The primary program focuses on refinement of swimming stroke techniques, safety and survival skills, and respect for the water.

Squad

Suitable for both children and adults seeking to extend their swimming abilities.

Private one-on-one lessons

Suitable for all ages, private lessons provide a unique and tailored learning environment to maximise your development.

Special needs classes

Qualified and experienced Special Needs Swimming Instructors teach adults and children of all abilities to progress at their own pace.

Lessons will run across the new program pool and 25 meter indoor pool. For more information on lesson days and times, please contact the Warragul Leisure Centre.
