# Introduction

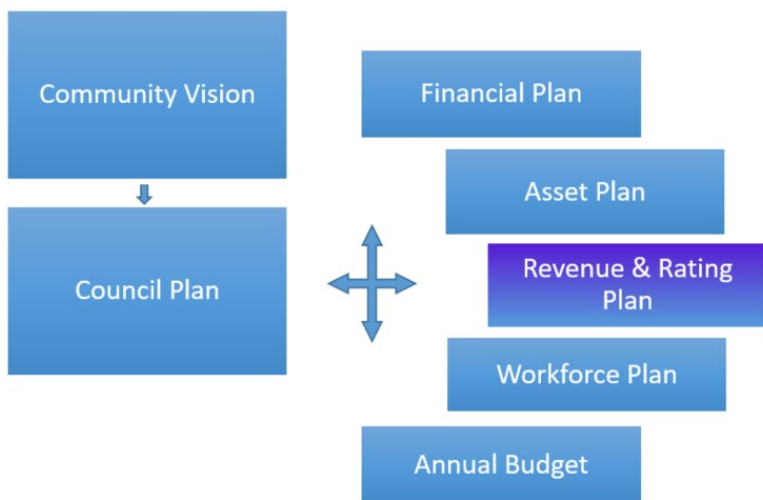

The *Local Government Act 2020* (the Act) requires each Council to prepare a Revenue and Rating Plan to cover a minimum period of four years following each Council election. The Revenue and Rating Plan establishes the revenue raising framework within which the Council proposes to work.

The purpose of the Revenue and Rating Plan is to determine the most appropriate and affordable revenue and rating approach for Baw Baw Shire Council, which in conjunction with other income sources, will adequately finance the objectives in the Council Plan.

This Plan is an important part of Council's integrated planning framework, all of which is created to help the Community achieve its long-term vision of the Shire - to be Sustainable, Healthy and Thriving:

- Sustainable towns and villages that continue to benefit from our beautiful rural and natural environment,
- Healthy people, living in connected communities and healthy environments, and
- Thriving, diverse and resilient communities.

Strategies outlined in this Plan align with the objectives contained in the Council Plan and will feed into our budgeting and long-term financial planning documents, as well as other strategic planning documents under our Council's strategic planning framework.

This Plan will explain how Council calculates the revenue needed to fund its activities, and how the funding burden will be apportioned between ratepayers and other users of Council facilities and services.

In particular, this Plan will set out decisions that Council has made in relation to rating options available to it under the Act to ensure the fair and equitable distribution of rates across property owners. It will also set out principles that are used in decision making for other revenue sources such as fees and charges.

It is also important to note that this plan does not set revenue targets for Council. It outlines the strategic framework and decisions that inform how Council will go about calculating and collecting its revenue.

## Executive Summary and Recommendations

This Plan details the framework and rating options that Baw Baw Shire Council will use in determining a fair and equitable distribution of rates for the community.

Four key platforms form the basis of the approach to rating at Baw Baw Shire Council and this is recommended for continuation:

- a) Rates will continue to be based principally on an ad-valorem basis (i.e., based on the valuation of the various properties);
- b) Council will continue to apply a service charge to fully recover the cost of the collection and disposal of waste;
- c) Council will continue to apply differential rating to ensure all rateable land makes an equitable financial contribution to the cost of carrying out the functions of Council; and
- d) Council does not levy a Municipal Charge.

The longer-term view is to consider the use of a:

- a) Special rate and/or charge to defray the costs of a performance of a function or power of Council e.g. to cover costs of specific infrastructure projects; and
- b) Levy to create reserve funds to be used in the event of a future natural disaster event, such as storm damage.

Consideration	Plan Recommendations
Rates: Determining which valuation base to use	That Baw Baw Shire Council continues to apply Capital Improved Valuation (CIV) as the valuation methodology to levy Council rates.
Rates: Determining the rating system	That Council continues to apply differential rating as its rating system.
Rates: What differential rates should be applied?	<p>That Council applies differential rates for:</p> <ol style="list-style-type: none"> <li>1. Residential Land, including flats and units, at the general rate; and</li> <li>2. Farm Land at a discount of 20 per cent to the general rate; and</li> <li>3. Commercial and Industrial Land with a surcharge of 30 percent on the general rate; and</li> <li>4. Vacant Land differential with a surcharge of 80 percent on the general rate; and</li> <li>5. Urban Living Land differential at a discount of 10 percent to the general rate; and</li> <li>6. Residential Development Land differential with a surcharge of 30 percent on the general rate.</li> <li>7. Commercial and Industrial Vacant Land differential with a surcharge of 140 percent on the general rate.</li> </ol>
Rates: Eligible pensioner rebate	That Council continues to provide an eligible pensioner rebate of \$50 for all eligible pension card holders in addition to the State Government Rebate.

Consideration	Plan Recommendations
Rates: Impact of Council revaluations	That Council reviews the impacts of revaluations, provided by the Victorian Valuer General, as they occur.
Rates: Special rates and charges	<p>That Council uses special rates and charges in instances that fit the following circumstances:</p> <ul style="list-style-type: none"> <li>• funding of narrowly defined capital projects (e.g., streetscape works, private road sealing) where special benefit can be shown to exist for a particular grouping of property owners;</li> <li>• raising funds for a dedicated purpose where the use of CIV is not the most equitable method of calculating property owner contributions. (e.g., Natural Disaster funds); and</li> <li>• covering the cost of an expense relating to a specific group of ratepayers (e.g. licensed premises).</li> </ul> <p>In circumstances outside of the above three scenarios, Council will use differential rating to achieve its objectives.</p>
Rates: Municipal charge	That Council does not implement a Municipal Charge as part of its Revenue & Rating Plan in 2024/25.
Rates: Service rates and charges	That Council continues to apply a Waste Service Charge as part of its Revenue & Rating Plan in 2024/25 in line with Local Government Minister's guideline.
Rates: Rate payment date options	<p>That Council continues to apply in accordance with Section 167(1) of the Local Government Act 1989, paying rates and charges by way of four instalments and does not offer the February lump sum payment option.</p> <p>Payments are due on the prescribed dates below:</p> <ul style="list-style-type: none"> <li>• 1st Instalment: 30 September</li> <li>• 2nd Instalment: 30 November</li> </ul>

Consideration	Plan Recommendations
	<ul style="list-style-type: none"> <li>• 3rd Instalment: 28 February</li> <li>• 4th Instalment: 31 May</li> </ul> <p>That Council removes the early payment competition to ensure fairness and equity to all ratepayers.</p>
Other income	<p>Council Fees and Charges will change in line with the Fees and Charges Schedule for 2024/25.</p> <p>Statutory Fees and Fines will continue to be based on Penalty Units as defined by the Department of Treasury and Finance.</p> <p>Interest on arrears and overdue rates Interest is charged on all overdue rates in accordance with Section 172 of the Local Government Act 1989. The interest rate applied is fixed under Section 2 of the Penalty Interest Rates Act 1983, which is determined by the Minister and published by notice in the Government Gazette</p>

# 1. Purpose

## 1.1 What is a Revenue & Rating Plan and why have one?

Council provides a number of services and facilities to our local community, and in doing so, must collect revenue to cover the cost of providing these services and facilities.

Council's revenue sources include:

- Rates and Charges
- Waste and garbage charges (if applicable)
- Grants from other levels of Government
- Statutory Fees and Fines
- User Fees
- Cash and non-cash contributions from other parties (i.e. developers, community groups)
- Interest from investments
- Sale of Assets
- Other income

Rates are the most significant revenue source for Council and make up roughly 59 per cent of total annual income in 2024/25.

The introduction of rate capping under the Victorian Government's *Fair Go Rates System* (FGRS) has brought a renewed focus to Council's long-term financial sustainability. The FGRS continues to restrict Council's ability to raise revenue above the rate cap unless application is made to the Essential Services Commission for a variation. Maintaining service delivery levels and investing in community assets remain key priorities for Council. This Plan will address Council's reliance on rate income and provide options to actively reduce that reliance.

Council provides a wide range of services to the community, often for a fee or charge. The nature of these fees and charges generally depends on whether they relate to statutory or discretionary services. Some of these, such as statutory planning fees are set by State Government statute and are commonly known as regulatory fees. In these cases, councils usually have no control over service pricing. However, in relation to other services, Council has the ability to set a fee or charge and will set that fee based on the principles outlined in this Revenue and Rating Plan.

Council revenue can also be adversely affected by changes to funding from other levels of government. Some grants are tied to the delivery of council services, whilst many are tied directly to the delivery of new community assets, such as roads or

sports pavilions. It is important for Council to be clear about what grants it intends to apply for, and the obligations that grants create in the delivery of services or infrastructure.

## 1.2 Community Engagement

The Revenue and Rating Plan outlines Council's decision-making process on how revenues are calculated and collected. The following public consultation process will be/was followed to ensure due consideration and feedback is received from relevant stakeholders in accordance with council's adopted Community Engagement Policy

Revenue and Rating Plan community engagement process:

- Draft Revenue and Rating Plan prepared by officers;
- Draft Revenue and Rating Plan placed on public exhibition at 18 April 2024 Council meeting for a period of 21 days and calling for public submissions;
- Community engagement through local news outlets and social media;
- Hearing of public submissions 15 May 2024; and
- Revenue and Rating Plan presented to 19 June 2024 Council meeting for adoption.

## 2. Rating – the Legislative Framework

The purpose of this section is to outline the legislative framework within which Council operates its rating system and the various matters that Council must consider when making decisions on rating objectives.

### 2.1 Legislative Framework

The legislative framework set out in the Act determines Councils' ability to develop a rating system. The framework provides significant flexibility for Council to tailor a system that suits its needs.

Section 155 of the Act provides that a Council may declare the following rates and charges on ratable land:

- General rates under Section 158
- Municipal charges under Section 159
- Service rates and charges under Section 162
- Special rates and charges under Section 163

The recommended strategy in relation to municipal charges, service rates and charges and special rates and charges are discussed later in this document.

In raising Council general rates, Council is required to primarily use the valuation of the ratable property to levy rates. Section 157 (1) of the Act provides Council with three choices in terms of which valuation base to use. They are: Site Valuation, Capital Improved Valuation and Net Annual Value.

The advantages and disadvantages of the respective valuation basis are discussed further in this document. Whilst this document outlines Council's strategy regarding rates revenue, rates data will be contained in the Council's Annual Budget as required by the Act and the integrated planning and reporting requirements of the Act.

Section 94(2) of the Act states that Council must adopt a budget by 30 June each year (or at another time fixed by the Minister) to include:

- a) the total amount that the Council intends to raise by rates and charges;
- b) a statement as to whether the rates will be raised by the application of a uniform rate or a differential rate;
- c) a description of any fixed component of the rates, if applicable;
- d) if the Council proposes to declare a uniform rate, the matters specified in section 160 of the Act;
- e) if the Council proposes to declare a differential rate for any land, the matters specified in section 161(2) of the Act;

Section 94(3) of the Act also states that Council must ensure that, if applicable, the budget also contains a statement –

- a) that the Council intends to apply for a special order to increase the Council's average rate cap for the financial year or any other financial year; or
- b) that the Council has made an application to the Essential Services Commission for a special order and is waiting for the outcome of the applications; or
- c) that a special Order has been made in respect of the Council and specifying the average rate cap that applies for the financial year or any other financial year.

This Plan outlines the principles and strategic framework that Council will use in calculating and distributing the rating burden to property owners, however, the quantum of rate revenue and rating differential amounts will be determined in the annual Baw Baw Shire Council budget.

In 2019 the Victorian State Government ran the Local Government Rating System Review, which may or may not substantially change the way Council calculates rates and distributes the rating burden in the future. At the time of publication, no changes from the Local Government Rating System Review had been implemented, and no timeline for implementation announced.

## 2.2 Rating Principles

### Taxation Principles:

When developing a rating strategy, in particular with reference to differential rates, a Council should give consideration to the following good practice taxation principles:

- Wealth Tax
- Equity
- Efficiency
- Simplicity
- Benefit
- Capacity to Pay
- Diversity

The “wealth tax” principle implies that the rates paid are dependent upon the value of a ratepayer's real property and have no correlation to the individual ratepayer's consumption of services or the perceived benefits derived by individual ratepayers from the expenditures funded from rates.

### Equity

Horizontal equity – ratepayers in similar situations should pay similar amounts of rates (ensured mainly by accurate property valuations, undertaken in a consistent manner, their classification into homogenous property classes and the right of appeal against valuation).

Vertical Equity – those who are better off should pay more rates than those worse off (the rationale applies for the use of progressive and proportional income taxation. It implies a “relativity” dimension to the fairness of the tax burden).

### **Efficiency**

Economic efficiency is measured by the extent to which production and consumption decisions by people are affected by rates.

### **Simplicity**

How easily a rates system can be understood by ratepayers and the practicality and ease of administration.

### **Benefit**

The extent to which there is a nexus between consumption/benefit and the rate burden.

### **Capacity to Pay**

The capacity of ratepayers or groups of ratepayers to pay rates.

### **Diversity**

The capacity of ratepayers within a group to pay rates.

The rating challenge for Council therefore is to determine the appropriate balancing of competing considerations.

### Rates and Charges Revenue Principles:

Property rates will:

- be reviewed annually,
- not change dramatically from one year to next, and
- be sufficient to fund current expenditure commitments, and:
  - Council’s Vision, and
  - Deliverables outlined in the Council Plan, Long Term Plan, and Asset Plan.

Differential rating should be applied as equitably as is practical and will comply with the [Ministerial Guidelines for Differential Rating 2013](#).

## **2.3 What Rates and Charges may a Council declare?**

Section 155 of the Act provides that a Council may declare the following rates and charges on rateable land-

- a) General Rates under section 158;
- b) Municipal Charges under section 159;
- c) Service Rates and Charges under section 162; and
- d) Special Rates and Charges under section 163.

The recommended plan in relation to municipal charges, service rates and charges and special rates and charges are discussed in sections 8, 9 and 10 of this Revenue & Rating Plan.

## 2.4 Valuation Methodology available to Council

In raising Council rates, Council is required to primarily use the valuation of the rateable property to levy rates.

Under the Act, Council has three choices in terms of which valuation base to utilise. They are Site Valuation, Capital Improved Valuation and Net Annual Value. The advantages and disadvantages of the respective valuation basis are discussed in section 5 of this Revenue & Rating Plan.

## 2.5 Declaring Rates and Charges

Section 158 of the Act provides that Council must, at least once in respect of each financial year, declare the following for that year: -

- a) the amount which Council intends to raise by way of general rates, municipal charges, service rates and service charges;
- b) whether the general rates will be raised by application of –
  - i. a uniform rate; or
  - ii. differential rates (if Council is permitted to do so under section 161(1) of the Act; or
  - iii. urban farm rates, farm rates or residential use rates (if Council is permitted to do so under Section 161A of the Act).

Council's approach to the application of differential rates is discussed in section 6 of this Revenue & Rating Plan.

### 3. Understanding the rating framework at Baw Baw Shire Council

The Baw Baw Shire Council currently applies the Capital Improved Valuation method of valuation in order to levy its rates. Council applies the following differential rating categories for 2024/25

#### Prior Year Rating Categories 2023/24

2023/24 Rating Category	No. of Rating Units	Capital Improved Value	% total of CIV
Residential	23,467	\$16,391,158,000	67.9%
Commercial and Industrial	1,706	\$1,613,627,000	6.7%
Vacant land	1,352	\$621,715,000	2.6%
Farm	2,405	\$5,011,182,000	20.8%
Urban Living	71	\$278,030,000	1.1%
Residential Development	17	\$166,050,000	0.7%
Recreational	14	\$43,220,000	0.2%
<b>Total Rateable Properties</b>	<b>29,032</b>	<b>\$24,124,982,000</b>	<b>100.0%</b>

#### Rating Categories 2024/25 year

2024/25 Rating Category	No. of Rating Units	Capital Improved Value	% total of CIV
Residential	23,956	\$16,660,431,000	67.1%
Commercial and Industrial	1,712	\$1,689,648,000	6.8%
Vacant land	1,168	\$534,695,000	2.1%
Farm	2,415	\$5,341,982,000	21.5%
Urban Living	69	\$261,130,000	1.1%
Residential Development	16	\$228,750,000	0.9%
Recreational	14	\$44,790,000	0.2%
Commercial and Industrial Vacant Land	75	\$84,585,000	0.3%
<b>Total Rateable Properties</b>	<b>29,425</b>	<b>\$24,846,011,000</b>	<b>100.0%</b>

Rate Details	Budget 2023/24	Proposed 2024/25
Rates	\$60,366,155	\$62,990,366
Service Rates and Charges	\$12,260,732	\$11,977,499
<b>Total (excluding supplementary rates &amp; interest)</b>	<b>\$72,626,887</b>	<b>\$74,967,865</b>

Rates revenue and Garbage Charge projections for four years can be found in Section 12.

In terms of the differential rates that Council applies, the below table compares the various “surcharges and discounts” that are utilised in the current and proposed rating structure.

Rating Category	2023/24 Rate in the \$	2023/24 Relative to Residential	2024/25 Rate in the \$	2024/25 Relative to Residential
Residential	0.002503	1.0	0.00253571	1.0
Commercial and Industrial	0.003253	1.3	0.00329642	1.3
Vacant land	0.004504	1.8	0.00456428	1.8
Farm	0.002001	0.8	0.00202857	0.8
Urban Living	0.002251	0.9	0.00228214	0.9
Residential Development	0.003253	1.3	0.00329642	1.3
Commercial and Industrial Vacant Land	N/A	N/A	0.00608571	2.4

Council currently uses a service charge to fully recover the cost of fulfilling its waste collection and disposal function. It does not apply any service rates or special rates and charges under the Act.

Listed on the following page are the waste charges. These charges are levied under section 162 of the Act.

Type of charge	Adopted 2023/24	Total Income	Proposed 2024/25	Total Income
Residential Charge	\$488.00	\$11,349,416	\$464.00	\$11,060,368
Residential additional green waste	\$91.00	\$69,615	\$87.00	\$83,520
Residential additional 120 litre garbage	\$113.00	\$143,623	\$107.00	\$154,722
Residential additional 240 litre recycling	\$63.00	\$38,052	\$60.00	\$41,160
Tanjil Bren garbage	\$152.00	\$6,536	\$144.00	\$6,192
Walhalla garbage	\$234.00	\$16,380	\$223.00	\$15,833
Commercial garbage - 120 litre	\$531.00	\$261,252	\$504.00	\$250,488
Commercial garbage - 240 litre	\$630.00	\$372,230	\$599.00	\$361,796
Commercial garbage - additional 240 litre	\$63.00	\$3,528	\$60.00	\$3,420
<b>TOTAL</b>		<b>\$12,260,732</b>		<b>\$11,977,499</b>

Council currently does not apply any municipal charge for the purpose of defraying administration costs of Council.

## 4. Determining which valuation base to use

As outlined above, under the Act, Council has three options for the valuation base it elects to use.

They are:

- a) **Capital Improved Valuation (CIV)** – Value of land and improvements upon the land
- b) **Site Valuation (SV)** – Value of land only
- c) **Net Annual Value (NAV)** – Rental valuation based on CIV. For residential and farm properties, NAV is calculated at five per cent of the Capital Improved Value. For commercial and industrial properties NAV is calculated as the greater of the estimated annual rental value or five per cent of the CIV.

### 4.1 Capital Improved Value

CIV is the most commonly used valuation base by Victorian Local Government. Based on the value of both land and all improvements on the land, it is relatively easy to understand for ratepayers as it equates the market value of the property.

Section 161 of the Act provides that a Council may raise any general rates by the application of a differential rate if it uses the capital improved value system of valuing land; and

#### Advantages of using CIV

- CIV includes all improvements, and hence is often supported on the basis that it more closely reflects “capacity to pay”. The CIV valuation method takes into account the full development value of the property and hence better meets the equity criteria than SV and NAV.
- With the increased frequency of valuations (previously two year intervals, now one year intervals), the market values are more predictable and this has reduced the level of objections resulting from valuations. The concept of the market value of property is far more easily understood with CIV rather than NAV or SV.
- Most councils in Victoria have now adopted CIV, which makes it easier to compare relative movements in rates and valuations across and between councils' municipal districts.
- The use of CIV allows councils to apply differential rates so as to equitably distribute the rating burden based on ability to afford rates. CIV allows

Council to apply higher rating differentials to the commercial and industrial sector that offset residential rates.

- The 2018 Local Government Bill (now lapsed) recommended a change to the legislation to require all councils to use CIV. Although the legislation was not adopted at the time, it may be revisited in the near future as a result of the State Government's review into Local Government Rating Systems.

### **Disadvantages of using CIV**

- The main disadvantage with CIV is the fact that rates are based on the total property value, which may not necessarily reflect the income level of the property owner, as with pensioners and low income earners.

## **4.2 Site Value**

There are currently no Victorian Councils that use this valuation base. With valuations based simply on the valuation of land and with only very limited ability to apply differential rates, the implementation of Site Value would cause a shift in rate burden from the industrial/commercial sectors onto the residential sector, and would hinder Council's objective of a fair and equitable rating system.

There would be further rating movements away from modern townhouse style developments on relatively small land parcels to older established homes on quarter acre residential blocks. In many ways, it is difficult to see an equity argument being served by the implementation of site valuation in the Baw Baw Shire Council.

### **Advantages of Site Value**

- There is a perception that under site valuation, a uniform rate would promote development of land, particularly commercial and industrial developments. There is, however, little evidence to prove that this is the case.
- Scope for possible concessions for urban farm land and residential use land.

### **Disadvantages in using Site Value**

- Under SV, there will be a significant shift from the Industrial/Commercial sector onto the residential sector of Council. The percentage increases in many cases would be in the extreme range.

- SV is a major burden on property owners that have large areas of land. Some of these owners may have much smaller/older dwellings compared to those who have smaller land areas but well developed dwellings – but will pay more in rates. A typical example is flats, units, or townhouses which will all pay low rates compared to traditional housing styles.
- The use of SV can place pressure on Council to give concessions to categories of landowners on whom the rating burden is seen to fall disproportionately (e.g. Farm land and residential use properties). Large landowners, such as farmers for example, are disadvantaged by the use of site value.
- SV will reduce Council’s rating flexibility and options to deal with any rating inequities due to the removal of the ability to levy differential rates.
- The community may have greater difficulty in understanding the SV valuation on their rate notices, as indicated by many inquiries from ratepayers on this issue handled by Council’s Customer Service and Property Revenue staff each year.

### 4.3 Net Annual Value

NAV, in concept, represents the annual rental value of a property. However, in practice, NAV is closely linked to CIV for Residential Land and Farm Land. Valuers derive the NAV directly as five per cent of CIV.

In contrast to the treatment of Residential Land and Farm Land, NAV for Commercial and Industrial Land is assessed with regard to actual market rental. This differing treatment of has led to some suggestions that all properties should be valued on a rental basis.

Overall, the use of NAV is not supported. For ratepayers, in respect of Residential Land and Farm Land, actual rental values poses some problems. The artificial rental estimate used may not represent actual market value, and means the base is the same as CIV but is harder to understand.

In choosing a valuation base, councils must decide on whether they want to adopt a differential rating system (different rates in the dollar for different property categories) or a uniform rating system (same rate in the dollar). If a council was to choose the former, under the Act, it must adopt either of the CIV or NAV methods of rating.

## 4.4 Summary

It is recommended that Council continues to apply CIV as the valuation base for the following reasons:

- CIV is considered to be the closest approximation to an equitable basis for distribution of the rating burden.
- CIV provides Council with the ability to levy a full range of differential rates. Only limited differential rating is available under the other valuation bases.
- It should be noted that almost all Victorian councils apply CIV as their valuation base and, as such, it has a wider community acceptance and understanding than the other rating bases.

### Plan Recommendation

That Baw Baw Shire Council continues to apply Capital Improved Value as the valuation methodology to levy Council rates.

## 5. Determining the Rating System – Uniform or Differential?

Council may apply a uniform rate or differential rates as a means of raising revenue. They are quite different in application and have different administrative and appeal mechanisms that need to be taken into account.

### 5.1 Uniform rate

The Act stipulates that, if a council declares that general rates will be raised by the application of a uniform rate, the council must specify a percentage as the uniform rate. Rates will be determined by multiplying that percentage by the value of the relevant land.

Council has not adopted uniform rates and continues to adopt a differential rating system.

### 5.2 Differential Rates

Council has, since its inception, adopted differential rating as its Revenue & Rating Plan as it believes that it contributes to the equitable distribution of the rating burden. Differential rating allows rates for particular classes of properties to be assessed at different levels from the general rate set for the municipality. Differential rating allows Council to shift part of the rate burden from some groups of ratepayers to others, through different “rates in the dollar” for each class of property.

Under the Act, Council is entitled to apply differential rates provided that it uses CIV as its basis for rating.

Section 161 of the Act prescribes requirements for differential rates and relevantly provides that:

- (1) *A Council may raise any general rates by the application of a differential rate if it uses the capital improved value system of valuing land.*
- (2) *If a Council declares a differential rate for any land, the Council must—*

- (a) *specify the objectives of the differential rate which must include the following—*
- i) *a definition of the types or classes of land which are subject to the rate and a statement of the reasons for the use and level of that rate in relation to those types or classes of land;*
  - (ii) *an identification of the types or classes of land which are subject to the rate in respect of the uses, geographic location (other than location on the basis of whether or not the land is within a specific ward in the Council's municipal district) and planning scheme zoning of the land and the types of buildings situated on it and any other criteria relevant to the rate;*
  - (iii) *if there has been a change in the valuation system, any provision for relief from a rate for certain land to ease the transition for that land; and*
- (b) *specify the characteristics of the land which are the criteria for declaring the differential rate.*
- (5) *The highest differential rate in a municipal district must be no more than four times the lowest differential rate in the municipal district.*

Council, in striking the rate through the Annual Budget process, sets the differential rate for set classes of properties at higher or lower amounts than the general rate. Currently, there are seven different levels of rates proposed in this Revenue & Rating Plan.

### 5.3 Objective of the rate and characteristics

Council believes each differential rate will contribute to the equitable and efficient carrying out of council functions. Details of the objectives of each differential rate, the classes of land which are subject to each differential rate and the uses of each differential rate are set out below (refer to 6.2)

### 5.4 Advantages of a differential rating system

The advantages of utilising a differential rating system are that it:

- provides greater flexibility to distribute the rate burden between all classes of property and therefore to link rates with the ability to pay, including reflecting the tax deductibility of rates for Commercial and Industrial Land;
- allows Council to better reflect the investment required to establish infrastructure, especially to meet the needs of the commercial and industrial sector;
- enables Council to encourage particular types of development through its rating approach (e.g. encourage building on vacant blocks);
- allows Council to reflect the unique circumstances of some rating categories where the application of a uniform rate may create an inequitable outcome (e.g. farming enterprises); and allows Council discretion in the imposition of rates to 'facilitate and encourage appropriate development of its municipal district in the best interests of the community'.

## 5.5 Disadvantages of Differential Rating

The disadvantages in applying differential rating are that:

- the justification of the differential rate can, at times, be difficult for the various rating groups to accept, giving rise to queries, objections and complaints where the differentials may seem to be excessive;
- differential rates can be confusing to ratepayers, as they may have difficulty understanding the system. Ratepayers within some rating categories may feel that they are unfavourably treated because they are paying a higher level of rates than other ratepayer groups; and
- differential rating involves a degree of administrative complexity as properties continually shift from one differential rating category to another (e.g. Residential to Commercial, Vacant to Residential) requiring Council to continually update its records. Ensuring the accuracy/integrity of Council's database is critical to ensure that properties are correctly classified into their correct differential rating categories.

### Plan Recommendation

That Baw Baw Shire Council continues to apply differential rating as its rating system.

## 6. What differential rates should be applied?

The Act allows councils to “differentiate” rates based on the use of the land, the geographic locality of the land or a combination of the use and locality of the land.

Council has a diverse mix of geographically located and land use properties. Valuation methodology is not consistent between differing land use property types and the establishment of differential tariff groups ensures greater equity and contribution from rates according to land use characteristics in relation to affordability and taxation principles.

The table below highlights the differential rates currently applied by Council and the proposed differential rates in 2024/25.

Rating Category	2023/24 Rate in the \$	2023/24 Relative to Residential	2024/25 Rate in the \$	2024/25 Relative to Residential
Residential	0.002503	1.0	0.00253571	1.0
Commercial and Industrial	0.003253	1.3	0.00329642	1.3
Residential Vacant land	0.004504	1.8	0.00456428	1.8
Farm	0.002001	0.8	0.00202857	0.8
Urban Living	0.002251	0.9	0.00228214	0.9
Residential Development	0.003253	1.3	0.00329642	1.3
Commercial and Industrial Vacant Land	N/A	N/A	0.00608571	2.4

### 6.1 Basis for Baw Baw Shire’s Differential Rates Policy:

Council has established a rating structure which is comprised of two key elements. These are:

- property values, based on CIV; and
- differential rates in the dollar to reflect use of services provided by Council.

Striking a proper balance between these elements provides equity in the distribution of the rate burden across residents.

- Rating, through the application of higher differentials recognises the ability of some ratepayers to obtain concessions from the tax deductibility of Council rates and provides for a series of differential rates. This takes into account low economic return to large landholdings, avoids distortions in the market and an ability to contribute above the standard charge.
- Rating shall endeavour to promote and encourage economic development throughout the municipality.
- The Farm Land Rate is intended to recognise the benefits of large holdings, open space and, traditionally, generally less demand upon Council services per land area held. Council has used a combination of a differential rate and section 169 of the Act (the rebate) in order to maintain the status of farms as the lowest rated group.
- Vacant Land is rated at a higher rate in the dollar than Residential Land to encourage the development of the land.
- Cultural and Recreational Land is subject to a rate concession in accordance with the requirements of Section 161 of the Act and the *Cultural and Recreational Lands Act 1963*, which require for a council to grant a rating concession to any 'recreational lands' which meet the test of being 'rateable land' under the Act. The current recreational land discount is equivalent to 100 per cent of the rates (excluding charges) payable, with the exception of the Warragul Country Club, which is rebated by 47 per cent.

## 6.2 Differential Rate Categories

Each differential rate will be determined by multiplying the CIV of each piece of rateable land within Council's municipal district (categorised by the characteristics described below) by the relevant percentages indicated above. Details of the objectives of each differential rate, the types of classes of land which are subject to each differential rate and the uses of each differential rate are set out below.

### 6.2.1 Residential

Council is forecast to have 23,956 Residential assessments within its municipal district as at 1 July 2024. This category includes all residential properties, including

flats, units and hobby farms. It contributes 67.1 per cent of the total rates levied.

### **Objectives:**

The objective of this differential rate is to ensure that all rateable land makes an equitable financial contribution to the cost of carrying out the functions of Council, including (but not limited to) the:

- Construction and maintenance of infrastructure assets;
- Development and provision of health and community services; and
- Provision of general support services.

### **Characteristics**

Residential Land is any land:

- a) that is used primarily for residential purposes; or
- b) on which a habitable building is erected, which building is unoccupied,
- c) any land which is not otherwise classified as Commercial and Industrial Land, Farm Land, Vacant Land, Commercial and Industrial Vacant Land, Urban Living Land, or Residential Development Land.

### **Type and Classes:**

The type and classes of rateable land within this differential rate are those having the relevant characteristics described above.

### **Type of Buildings:**

The types of buildings on the land within this differential rate are all buildings which are already constructed on the land at the date of declaration of rates for the relevant financial year.

### **Geographic Location:**

Wherever located within the municipal district

### **Use of Differential rate:**

The money raised by the differential rate will be applied to the items of expenditure described in the Budget by Council. The level of the rate for land in this category is considered to provide for an appropriate contribution to Council's budgeted expenditure, having regard to the characteristics of the land.

### **Use of Land:**

The use of the land within this differential rate is, in the case of improved land, any use of land creating the relevant characteristics described in the characteristics above.

## Planning Scheme Zoning

The planning scheme zoning, is the zoning applicable to each rateable land within this category, as determined by consulting maps referred to in the relevant Planning Scheme

### 6.2.2 Commercial and Industrial

The number of commercial and industrial properties within Council's municipal district as at 1 July 2024 is projected to be 1,712, contributing 8.8 per cent of the total rates. Commercial and Industrial Land is rated at 30 per cent above the general rate.

#### Objectives:

The objective of this differential rate is to ensure that all rateable land makes an equitable financial contribution to the cost of carrying out the functions of Council.

#### Characteristics

Commercial and Industrial Land is any land which:

- a) does not have the characteristics of:
  - i. Residential Land;
  - ii. Farm Land;
  - iii. Vacant Land;
  - iv. Commercial and Industrial Vacant Land;
  - v. Urban Living Land; or
  - vi. Residential Development Land; or
- b) is otherwise zoned Commercial or Industrial under the Baw Baw Planning Scheme; and
- c) on which a building is erected, or the site is adapted for occupation and is used for commercial and or industrial purposes.

#### Type and Classes:

The types and classes of rateable land within this differential rate are those having the relevant characteristics described above.

#### Types of Buildings:

The types of buildings on the land within this differential rate are all buildings which are already constructed on the land at the date of declaration of rates for the relevant financial year.

**Geographic Location:**

Wherever located within the municipal district.

**Use of Land:**

The use of the land within this differential rate, is any use permitted under the relevant planning scheme.

**Planning Scheme Zoning**

The planning scheme zoning, is the zoning applicable to each rateable land within this category, as determined by consulting maps referred to in the relevant Planning Scheme

### 6.2.3 Farm

Council is projected to have 2,415 farm properties within its municipal district as at 1 July 2024, contributing 17.2 per cent to the total rates raised. These properties receive a “discount” of 20 per cent against the general rate. Farm operations that meet the following:

**Objectives:**

The objectives of the Farm Land Rate are to:

1. encourage uses compatible with the physical capability of the land;
2. minimise the need for urban works and services to the non-urban area;
3. conserve the resources of soil, flora and fauna and the significant natural features in the areas identified as having ecological and landscape interest value;
4. conserve as far as possible the existing patterns of vegetation to maintain landscape quality;
5. assist in the maintenance of farming activities within areas eminently suited for that purpose; and

6. discourage the proliferation of non-agricultural activities on soil of high agricultural value by protecting the social characteristics of the rural community from the encroachment of urban-type development.

### **Characteristics**

Farm Land is land which:

- a) does not have the characteristics of:
  - i. Urban Living Land; or
  - ii. Residential Development Land; or
  - iii. Commercial & Industrial Land; and
- b) has an area of at least 40 hectares and is used predominantly for the business of grazing (including agistment), dairying, pig-farming, poultry farming, fish farming, tree farming, bee-keeping, viticulture, horticulture, fruit growing or the growing of crops of any kind or for any combination of those activities; or
- c) has an area of not less than 2 hectares and less than 40 hectares for grazing (including agistment), dairying, pig-farming, poultry farming, fish farming, tree farming, bee-keeping, viticulture, horticulture, fruit growing or the growing of crops of any kind or for any combination of those activities and demonstrates, upon application, that the primary source of income is derived from the land that is used for a business.

To avoid doubt, 'business' for the purposes of identifying Farm Land has the same meaning as that given to it by section 2(1) of the *Valuation of Land Act 1960* for the same purpose, being a business that:

- a) has a significant and substantial commercial purpose or character; and
- b) seeks to make a profit on a continuous or repetitive basis from its activities on the land; and
- c) is making a profit from its activities on the land, or has a reasonable prospect of making a profit from its activities on the land if it continues to operate in the way that it is operating.

### **Type and Classes:**

The types and classes of rateable land within this differential rate are those having the relevant characteristics described above.

### **Types of Buildings:**

The types of buildings on the land within this differential rate are all buildings (if any) which are already constructed on the land at the date of declaration of rates for the relevant financial year.

**Geographic Location:**

Wherever located within the municipal district.

**Use of Land:**

The use of the land within this differential rate, is any use permitted under the relevant Baw Baw Shire planning scheme.

**Planning Scheme Zoning**

The land affected by this rate is that which is in any zone where farming is permitted by the Baw Baw Planning Scheme and which displays the characteristics described above.

## 6.2.4 Vacant Land

The number of Vacant Land properties within Council's municipal district is forecast to be 1,168 as at 1 July 2024, contributing 3.9 per cent to the total rates raised. These properties attract the Vacant Land differential which is a surcharge of 80 per cent above the residential rate.

**Objectives:**

The objective of this differential rate is to:

1. promote responsible land management through appropriate maintenance and development of the land; and
2. encourage prompt development of vacant land and attract new residents to Baw Baw; and
3. ensure that all rateable land makes an equitable financial contribution to the cost of carrying out the functions of Council.

**Characteristics:**

Vacant Land is land:

- a) does not have the characteristics of:
  - i. Farm Land;
  - ii. Urban Living Land; or
  - iii. Residential Development Land; or
  - iv. Commercial and Industrial Vacant Land; and

- b) On which no building is erected, save for any uninhabitable shed or shelter, the size of which does not exceed 5 percent of the total area of the land.

**Type and Classes:**

The types and classes of rateable land within this differential rate are those having the relevant characteristics described above.

**Geographic Location:**

Wherever located within the municipal district.

**Use of Land:**

The use of the land within this differential rate, is any use permitted under the relevant Baw Baw Shire planning scheme.

**Planning Scheme Zoning**

The vacant land affected by this rate is that which is located in any zone under the Baw Baw Shire Planning Scheme and which displays the characteristics described above.

## 6.2.5 Urban Living

Urban Living Land is land on larger allotments in residential, rural or semi-rural settings within an Urban Growth Zone which has a Precinct Structure Plan in place under the Baw Baw Planning Scheme, but for which the primary use is residential. Any primary production uses and associated improvements are secondary to that residential use.

The number of Urban Living Land properties within Council's municipal district is forecast to be 69 as at 1 July 2024, contributing 0.9 per cent to the total rates raised.

The Urban Living Land differential is set at 0.9, being lower than the residential land differential of 1.0.

The lower differential reflects a difference in the level of service provided by Council to this group of ratepayers. The average value of rateable properties in this category is higher than that for residential so, when calculated through to rates income, this group would pay a higher 'per property' payment than Residential Land, but potentially receive less in terms of service provision but for the lower differential.

## **Objectives:**

The objective of this rate is to ensure that all the identified (non-farming) properties, where services and utilities may be restricted, make a fair and equitable contribution to the costs of carrying out Council's functions and to recognise that ratepayers residing on Urban Living Land may not receive the same level of Council services as residents in the general / residential areas.

## **Characteristics**

Urban Living Land is land:

- a) which is located in the Urban Growth Zone which has a Precinct Structure Plan in place under the Baw Baw Planning Scheme;
- b) has an area not less than 2 hectares; and
- c) in respect of which no planning permit authorising subdivision of the land has been issued.

## **Type and Classes:**

The types and classes of rateable land within this differential rate are those having the relevant characteristics described above.

## **Types of Buildings:**

The types of buildings on the land within this differential rate all all buildings (if any) which are already constructed on the land at the date of declaration of rates for the relevant financial year.

## **Geographic Location:**

Wherever located within the municipal district.

## **Use of Land:**

The use of the land within this differential rate, is any use permitted under the relevant Baw Baw Shire planning scheme.

## **Planning Scheme Zoning**

The planning scheme zoning, is the zoning applicable to each rateable land within this category, as determined by consulting maps referred to in the relevant Planning Scheme.

## 6.2.6 Residential Development Land

Residential Development Land is similar to Urban Living Land, being located within an Urban Growth Zone which has a Precinct Structure Plan in place under the Baw Baw Planning Scheme.

The number of Residential Development Land properties within Council's municipal district is forecast to be 16 as at 1 July 2024, contributing 1.2 per cent to the total rates raised. The Residential Development Land differential is set at 1.3, being higher than the Residential Land differential of 1.0.

### **Objectives:**

The objective of this rate is to assist in the management of sustainable growth across Council's municipal district, as well as encourage residential subdivisions at a sustainable level ensuring sufficient supply.

### **Characteristics:**

Residential Development is land which:

- a) is located in the Urban Growth Zone which has a Precinct Structure Plan in place under the Baw Baw Planning Scheme; and
- b) has an area not less than 2 hectares; and
- c) in respect of which a planning permit authorising subdivision of the land has been issued; and
- d) Is not used as the owner's principal place of residence.

### **Type and Class:**

The types and classes of rateable land within this differential rate are those having the relevant characteristics described above.

### **Types of Buildings:**

The types of buildings on the land within this differential rate are all buildings (if any) which are already constructed on the land at the date of declaration of rates for the relevant financial year.

### **Geographic Location:**

Wherever located within the municipal district.

### **Use of Land:**

The use of the land within this differential rate, is any use permitted under the relevant Baw Baw Shire planning scheme.

### **Planning Scheme Zoning**

The planning scheme zoning, is the zoning applicable to each rateable land within this category, as determined by consulting maps referred to in the relevant Planning Scheme

## **6.2.7 Commercial and Industrial Vacant Land**

The number of Commercial and Industrial Vacant Land properties within Council's municipal district as at 1 July 2024 is projected to be 75 contributing 0.8 percent of total rates being raised.

### **Objectives:**

The objective of this rate is to promote commercial and industrial development within the appropriately zoned areas of the municipality. Reducing the possibility of landowners not progressing the development of their land in reasonable time which may impede the ability of other businesses to access suitable land for their own commercial and industrial use.

### **Characteristics:**

Commercial and Industrial Vacant Land is land which:

- a) no building is erected save for any shed or shelter the size of which does not exceed 5 percent of the total area of the land; and
- b) By reason of its locality and zoning under the Baw Baw Planning Scheme, would - if developed - be or likely to be used primarily for Commercial or Industrial purposes; and
- c) does not have the characteristics of:
  - I. Residential Land;
  - II. Farm Land;
  - III. Vacant Land;
  - IV. Urban Living Land;
  - V. Residential Development Land; or
  - VI. Commercial and Industrial Land.

### **Type and Class:**

The types and classes of rateable land within this differential rate are those with the relevant characteristics described above.

### Geographic Location:

Anywhere within the planning municipal district.

### Planning Scheme Zoning

The land affected by this rate is that which is in any zone where commercial and industrial development is permitted by the Baw Baw Shire Council Planning Scheme and which displays the characteristics described in the definition above.

## 6.2.8 Cultural & Recreational

The *Cultural and Recreational Lands Act 1963* (CRL Act) provides for a council to grant a rating concession in respect of any "recreational lands" which are rateable land under the Act.

The definition of "recreational lands" under section 2 of the CRL Act is lands which are:

- vested in or occupied by any body corporate or unincorporated body which exists for the purpose of providing or promoting cultural or sporting recreational or similar facilities or objectives and which applies its profits in promoting its objects and prohibits the payment of any dividend or amount to its members; and
- used for outdoor sporting recreational or cultural purposes or similar outdoor activities; or
- used primarily as agricultural showgrounds.

Section 169 of the Act provides an opportunity for Council to grant a concession for properties described by definition as a sporting club under the CRL Act.

In the 2024/25 rating year, Council will provide a concession to 14 properties meeting the definition of "culture and recreation". The general rate is applied to these properties to determine the declared rates payable for the financial year and a 100 per cent rebate will be applied, with the exception of the Warragul Country Club, which is rebated by 47 per cent. Service Charges are payable for any waste services received at the declared rate.

Cultural and Recreation Land Property	2024/25 Rates
<b>Properties receiving a 100% rebate</b>	
Drouin Bowling Club	2,800
Drouin Golf Club	19,854
Garfield Wattle Raceway / Drouin Speedway	1,782
Longwarry Bowls Club	2,494

Moe Field and Game and Angling Club	636
Neerim District Bowling Club	3,309
Thorpdale Bowling Club	1,247
Trafalgar Bowls Club Incorporated	4,073
Trafalgar Golf Club	5,982
Trafalgar Park Bowls Club Incorporated	1,884
Warragul Bowling Club	3,436
Warragul Drouin Pistol Club Incorporated	3,309
Yarragon Bowls Club	1,476
<b>Total 100% Rebate</b>	<b>\$52,282</b>

#### Property Receiving a 47% Rebate

Warragul Country Club Incorporated (rebate)	
\$61,722 @ 47%	29,009
<b>Total Rebate</b>	<b>\$81,291</b>

Warragul Country Club Incorporated (rate payable)	32,713
<b>Total</b>	<b>\$114,004</b>

The clubs listed above are considered to provide a benefit to the general community and their activities assist in the proper development of the municipal district.

### Plan Recommendations

- That Council continues to apply differential rates for:
  - Residential Land, including flats and units; and
  - Commercial and Industrial Land, with a surcharge 30 percent to the general rate; and
  - Farm Land, at a discount of 20 percent to the general rate; and
  - Vacant Land, with a surcharge of 80 percent to the general rate, and
  - Urban Living Land at a discount of 10 percent to the general rate in order to ease the rate burden on properties within the Urban Growth Zone with a Precinct Structure Plan in place under the Baw Baw Planning Scheme; and

## Plan Recommendations

- Residential Development Land with a surcharge 30 percent in respect of properties within the Urban Growth Zone with a Precinct Structure Plan; and
  - Commercial and Industrial Vacant Land, with a surcharge of 140 percent to the general rate.
2. That Council apply the 2.75 per cent rate cap as per the Fair Go Rates System (FGRS).
  3. That Council continues to grant a 100 per cent rebate of rates with the exception of the Warragul Country Club, which is rebated by 47 per cent, on Cultural and Recreational Land.

## 7. Understanding the impacts of Council Revaluations

Under the requirements of the Act, Council is required to conduct revaluations of all rateable assessments annually. A revaluation does not provide Council with any additional rate revenue but can significantly re-align how rates are distributed between ratepayers at both a rating group and individual level.

All rateable properties within Baw Baw Shire Council have been revalued at 1 January 2024 and are effective from 1 July 2024.

The table below highlights the impact of the 2024 Council revaluation, compared to 2023.

Rating Category	Number of Properties 2023/24	Capital Improved Value (CIV) 2023/24 \$'000	Number of Properties 2024/25	Capital Improved Value (CIV) 2024/25 \$'000	Average CIV 2023/24	Average CIV 2024/25	% Change CIV
Residential	23,467	\$16,391,158	23,956	\$16,660,431	\$698,477	\$695,460	(0.4%)
Commercial and Industrial	1,706	\$1,613,627	1,712	\$1,689,648	\$945,854	\$986,944	4.3%
Vacant land	1,352	\$621,715	1,168	\$534,695	\$459,848	\$457,787	(0.4%)
Farm	2,405	\$5,011,182	2,415	\$5,341,982	\$2,083,652	\$2,212,001	6.2%
Urban Living	71	\$278,030	69	\$261,130	\$3,915,915	\$3,784,493	(3.4%)
Residential Development	17	\$166,050	16	\$228,750	\$9,767,647	\$14,296,875	46.4%
Recreational	14	\$43,220	14	\$44,790	\$3,087,143	\$3,199,286	3.6%
Commercial and Industrial Vacant Land	N/A	N/A	75	\$84,585	N/A	\$1,127,800	N/A
<b>Total</b>	<b>29,032</b>	<b>\$24,124,982</b>	<b>29,425</b>	<b>\$24,846,011</b>	<b>\$830,979</b>	<b>\$844,384</b>	<b>1.6%</b>

The table highlights that, overall, Council's total CIV have increased by 2.99 percent over the one-year period from 2023 to 2024. Council needs to be mindful of the impacts of revaluations on the various property types in implementing its Revenue & Rating Plan (outlined in the previous sections) to ensure that rises and falls in Council rates remain affordable and that rating 'shocks' are mitigated to some degree.

## 7.1 Property Valuations

The *Valuation of Land Act 1960* is the principal legislation in determining property valuations. Under the *Valuation of Land Act 1960*, the Victorian Valuer-General conducts property valuations on an annual basis. Baw Baw Shire Council applies a Capital Improved Valuation (CIV) to all properties within the municipality to take into account the full development value of the property. This basis of valuation takes into account the total market value of the land including buildings and other improvements.

The value of land is always derived by the principal of valuing land for its highest and best use at the relevant time of valuation.

Council needs to be mindful of the impacts of revaluations on the various property types in implementing the differential rating strategy outlined in the previous section to ensure that rises and falls in Council rates remain affordable and that rating 'shocks' are mitigated to some degree.

## 7.2 Supplementary Valuations

Supplementary valuations are carried out for a variety of reasons including rezoning, subdivisions, amalgamations, renovations, new constructions, extensions, occupancy changes and corrections. The Victorian Valuer-General is tasked with undertaking supplementary revaluations and advises Council on a monthly basis of valuation and Australian Valuation Property Classification Code (AVPCC) changes.

Supplementary valuations bring the value of the affected property into line with the general valuation of other properties within the municipality. Objections to supplementary valuations can be lodged in accordance with Part 3 of the *Valuation of Land Act 1960*. Any objections must be lodged with Council within two months of the issue of the supplementary rate notice.

## 7.3 Objections to property valuations

Part 3 of the *Valuation of Land Act 1960* provides that a property owner may lodge an objection against the valuation of a property or the Australian Valuation Property Classification Code (AVPCC) within two months of the issue of the original or amended (supplementary) Rates and Valuation Charges Notice (Rates Notice), or within four months if the notice was not originally issued to the occupier of the land.

A property owner must lodge their objection to the valuation or the AVPCC in writing to the Baw Baw Shire Council. Property owners also have the ability to object to the site valuations on receipt of their Land Tax Assessment. Property owners can appeal their land valuation within two months of receipt of their

Council Rate Notice (via Council) or within two months of receipt of their Land Tax Assessment (via State Revenue Office).

## 8. Special Rates & Charges

Special rates and charges are covered under Section 163 of the Act, which enables Council to declare a special rate or charge or a combination of both for the purposes of

- defraying any expenses; or
- repaying with interest any advance made or debt incurred, or loan raised by Council, in relation to the performance of a function or the exercise of a power of Council. Council can only do so if it considers that the performance of the function or the exercise of the power is or will be of special benefit to a particular group of persons who are required to pay that special rate or special charge.

There are detailed procedural requirements that Council needs to follow to introduce a special rate or charge, including how Council can apply funds derived from this source.

Section 185 of the Act provides appeal rights to the Victorian Civil and Administrative Tribunal (Tribunal) in relation to the imposition of a special rate or charge. The Tribunal has wide powers, which could affect the viability of the special rate or charge scheme.

Council should be particularly mindful of the issue of proving that special benefit exists to those that are being levied the rate or charge.

In summary, differential rates are much simpler to introduce and generally less exposed to challenge. There may be instances, however, where a special rate or charge is desirable if raising the levy by use of CIV is not equitable.

It is recommended that Council uses special rates and charges only in the instances outlined below.

## Plan Recommendations

That Council use special rates and charges in instances that fit the following circumstances:

- Funding of narrowly defined capital projects (e.g. streetscape works, private road sealing) where special benefit can be shown to exist only for a grouping of property owners.
- Raising funds for a dedicated purpose where the use of CIV is not the most equitable method of calculating property owner contributions. (e.g. Natural Disaster).
- Covering the cost of an expense relating to a specific group of ratepayers.

## 9. Municipal Charge

Another principal rating option available to councils is the application of a municipal charge. Under Section 159 of the Act, Council may declare a municipal charge to cover some of its administrative costs. The legislation is not definitive on what comprises administrative costs and does not require Council to specify what is covered by the charge.

A council's total revenue from a municipal charge in a financial year must not exceed 20 percent of the combined sum total of the council's total revenue from the municipal charge and the revenue from general rates.

The application of a municipal charge represents a choice to raise a portion of the rates by a flat fee for all properties, rather than sole use of the CIV valuation method.

The arguments in favour of a municipal charge are similar to waste charges. They apply equally to all properties and are based upon the recovery of a fixed cost of providing administrative services irrespective of valuation. The same contribution amount per assessment to cover a portion of council's administrative costs can be seen as an equitable method of recovering these costs.

The argument against a municipal charge is that this charge is regressive in nature and would result in lower valued properties paying higher overall rates and charges than they do at present. The equity objective in levying rates against property values is lost in a municipal charge as it is levied uniformly across all assessments.

For this reason, this Revenue & Rating Plan recommends that Council does not apply a Municipal Charge.

### Plan Recommendations

That Council does not levy a Municipal Charge.

## 10. Service Rates and Charges

Section 162 of the Act provides Council with the opportunity to raise service rates and charges for any of the following services:

- a) the provision of a water supply;
- b) the collection and disposal of refuse;
- c) the provision of sewerage services; and
- d) any other prescribed service.

Council currently applies a Service Charge for the collection and disposal of refuse on properties that fall within the collection area. Council retains the objective of setting the Waste Service Charge for waste at a level that fully recovers the cost of fulfilling the waste collection and disposal function.

The advantage of the Waste Service Charge is that it is readily understood and accepted by residents as a fee for a direct service that they receive. It further provides equity in the rating system in that all residents who receive exactly the same service level all pay an equivalent amount.

The disadvantage of the Waste Service Charge is similar to the municipal charge in that it is regressive in nature. A fixed charge to a low valued property comprises a far greater proportion of the overall rates than it does to a more highly valued property.

On balance, however, it is recommended that Council retains the existing Waste Service Charge. Unlike a municipal charge, where the direct benefit to the resident is invisible – the Waste Service Charge is a tangible service that is provided directly to all in the same fashion.

Should Council elect not to have a Waste Service Charge, this same amount would be required to be raised by way of an increased general rate – meaning that residents in higher valued properties would substantially pay for the waste service of lower valued properties. Whilst this same principle applies for rates in general, the mix of having a single fixed charge combined with valuation driven rates for the remainder of the rate invoice provides a balanced and equitable outcome.

## Plan Recommendations

That Council:

- Continues to apply a Waste Service Charge as part of the 2024/25 Revenue & Rating Plan based on full cost recovery of the waste function.
- Follows the guidelines from Local Government minister and remove the costs associated with the litter and waste collection from public space and the provision of public bins; removal of street, footpath and drain cleaning from the waste charge. These will be funded from council revenue in 2024/25.
- Decrease the 2024/25 Waste Service Charges by an average of five per cent, rounded to the nearest dollar, compared to prior year 2023/24 levels.

## 11. Rate Payment Options

There are only two options available under the Act for Council to set due dates for payment of rates. The first is an option of a lump sum payment on a fixed date (which by law is set as 15 February of each year) and the second is a mandatory instalment approach where four payments are required at the end of September, November, February and May. Under this second approach, residents can elect to pay instalments in advance at any point.

Council has elected to move away from the lump sum payment method for two main reasons.

1. The first reason is that, under the Act, interest on late payments begins to accrue from the date that the first instalment is due (i.e. 30 September), irrespective of whether payment is made by instalment or by lump sum. Council has previously taken the view that it would not be fair and equitable to allow lump sum payments in February for the following reasons:
  - a) If a ratepayer elects to pay rates in four instalments and misses a payment, interest is payable from the due date of the payment (e.g., the first instalment due on 30 September is unpaid – interest is payable from 30 September on one quarter of total annual rates).
  - b) If a ratepayer chooses to pay rates in one lump sum on 15 February the following year and payment is not made by the due date – interest is payable from 15 February on the total rates.
2. The second reason for change relates to the improved cash flows that are associated with the instalment payment option. Council operates under a 1 July/30 June financial year and Victorian Local Government is probably the only government agency / utility that issues an annual account in July and then has to wait seven months to receive the majority of its revenue. During this time, Council is required to continue to provide operational services and capital works which places our cash position under severe strain.

When it is considered in the context of every other utility (e.g. telephone, gas, power, water etc), not one of these service providers is required to operate on the business rules that is a requirement for Local Government.

The introduction of mandatory instalments is aimed at better matching when Council receives its rate revenue against when it needs to expend these same amounts. The move brings Council into closer alignment with virtually every other utility service provider.

### Plan Recommendations

That Council continues to apply the mandatory four instalment payment option in future rating years and does not provide the February lump sum payment option.

## 12. Four year total revenue projections

	Forecast	Budget	Projections		
	Actual				
	2023/24	2024/25	2025/26	2026/27	2027/28
	\$'000	\$'000	\$'000	\$'000	\$'000
<b>Income</b>					
Rates and charges	73,931	<b>76,256</b>	79,574	82,819	86,161
Statutory fees and fines	2,562	<b>2,819</b>	2,903	2,990	3,080
User fees	2,464	<b>2,432</b>	2,529	2,630	2,736
Grants - Operating	14,707	<b>15,553</b>	15,941	16,420	16,912
Grants - Capital	19,472	<b>16,400</b>	22,131	19,413	11,765
Contributions - monetary					
	3,017	<b>4,811</b>	4,362	5,118	4,563
Contributions - non-monetary	7,316	<b>7,163</b>	7,513	7,513	7,513
Net gain/(loss) on disposal of property, infrastructure, plant and equipment	<b>440</b>	-	-	-	-
Share of net profits/(losses) of associates and joint ventures	-	-	-	-	-
Other income	3,110	<b>2,772</b>	2,472	2,371	2,272
<b>Total income</b>	<b>127,019</b>	<b>128,206</b>	<b>137,425</b>	<b>139,274</b>	<b>135,002</b>

## 12.1 Statutory fees and fines

	Forecast Actual 2023/24 \$'000	Budget 2024/25 \$'000	Change	
			\$'000	%
Infringements and costs	645	705	60	9.30%
Town planning fees	540	610	70	12.96%
Land information certificates	131	135	4	3.05%
Permits	894	954	60	6.71%
Other fees	352	415	63	17.90%
<b>Total statutory fees and fines</b>	<b>2,562</b>	<b>2,819</b>	<b>257</b>	<b>10.03%</b>

Statutory fees and fines are those which Council collects under the direction of legislation or other government directives. The rates used for statutory fees and fines are generally advised by the state government department responsible for the corresponding services or legislation, and generally councils will have limited discretion in applying these fees.

Examples of Statutory Fees and Fines include:

- Planning and subdivision fees
- Building and Inspection fees
- Infringements and fines
- Land Information Certificate fees

Penalty and fee units are used in Victoria's Acts and Regulations to describe the amount of a fine or a fee.

### Penalty units

Penalty units are used to define the amount payable for fines for many offences. For example, the fine for selling a tobacco product to a person aged under 18 is four penalty units.

The rate for penalty units is indexed each financial year so that it is raised in line with inflation. Any change to the value of a penalty unit will happen on 1 July each year.

### Fee units

Fee units are used to calculate the cost of a certificate, registration or licence that is set out in an Act or Regulation.

The cost of fees and penalties is calculated by multiplying the number of units by the current value of the fee or unit. The exact cost may be rounded up or down.

Statutory fees are included to the Fees and Charges Schedule detailed at Appendix A in the Annual Budget, the rates are charged as per State government

direction and updated once the State announces new rates, timing of State budget is different to council budget timeframes.

## 12.2 User fees

	Forecast	Budget	Change	
	Actual	2024/25		
	2023/24	2024/25	\$'000	%
	\$'000	\$'000	\$'000	%
Arts Centre	922	852	(69)	(7.49%)
Registration and other permits	881	956	75	8.51%
Leases and rents	149	102	(47)	(31.54%)
Other fees and charges	512	522	10	1.95%
<b>Total user fees</b>	<b>2,464</b>	<b>2,432</b>	<b>(32)</b>	<b>(1.29%)</b>

User fees and charges are those that Council will charge for the delivery of services and use of community infrastructure. Examples of User Fees and Charges include:

- Kindergarten and Childcare fees
- Leisure Centre, Gym, and Pool visitation and membership fees
- Waste Management fees
- Leases and facility hire fees.

The provision of infrastructure and services form a key part of Council's role in supporting the local community. In providing these, Council must consider a range of 'Best Value' principles including service cost and quality standards, value-for-money, and community expectations and values. Council must also balance the affordability and accessibility of infrastructure and services with its financial capacity and in the interests of long-term financial sustainability.

Councils must also comply with the government's Competitive Neutrality Policy for significant business activities they provide and adjust their service prices to neutralise any competitive advantages when competing with the private sector.

In providing services to the community, Council must determine the extent of cost recovery for particular services consistent with the level of both individual and collective benefit that the services provide and in line with the community's expectations.

In setting the Annual Budget, the key principle for determining the level of user charge has been to ensure fees and charges are set in accordance with Council's pricing policy. Commercial users are charged market price, with subsidy to community users where appropriate.

Council has developed a range of principles to determine the level of fees and charges to be applied to each service. Some of the main principles are:

- Fees and charges are set in line with other like services through a benchmarking exercise where possible.
- Fees and charges are set at a level that is deemed to be fair and equitable to enable the majority of residents to access the services.
- Reduced fees or subsidised model is incorporated to encourage community participation and achieve positive health outcomes.
- Fees are set in line with State or Federal government legislation or Local Laws.

User fees are expected to decrease by \$0.03 million or 1.28 per cent in 2024/25.

## 12.3 Grants

	Forecast	Budget	Change	
	Actual	2024/25	\$'000	%
	2023/24	2024/25	\$'000	%
	\$'000	\$'000	\$'000	%
<b>Grants were received in respect of the following:</b>

Sporting facilities	-	-	-	-
<b>Non-recurrent – State Government</b>				
Local and collector roads	880	2,902	2,022	230%
Footpaths	-	-	-	-
Sporting facilities	1,843	2,370	527	29%
Buildings	7,965	3,328	(4,637)	(58%)
<b>Total non-recurrent grants</b>	<b>17,868</b>	<b>14,664</b>	<b>(3,205)</b>	<b>(18%)</b>
<b>Total capital grants</b>	<b>19,472</b>	<b>16,400</b>	<b>(3,073)</b>	<b>(16%)</b>
<b>Total Grants</b>	<b>34,179</b>	<b>31,953</b>	<b>(2,226)</b>	<b>(7%)</b>

Grant revenue represents income usually received from other levels of government. Some grants are singular and attached to the delivery of specific projects, whilst others can be of a recurrent nature and may or may not be linked to the delivery of projects.

Council will pro-actively advocate to other levels of government for grant funding support to deliver important infrastructure and service outcomes for the community. Council may use its own funds to leverage higher grant funding and maximise external funding opportunities.

When preparing its financial plan, Council considers its project proposal pipeline, advocacy priorities, upcoming grant program opportunities, and co-funding options to determine what grants to apply for.

Operating grants include all monies received from State and Federal sources for the purpose of funding the delivery of Council's services to ratepayers and the community. Overall the level of operating grants is expected to increase by \$0.85 million in 2024/25. This is predominantly due to the expected grant income for the Financial Assistance Grant.

Capital grants include all monies received from State, Federal and community sources for the purpose of funding the capital works program. Overall the level of capital funding has decreased by \$3.07 million compared to 23/24 annual forecast.

## 12.4 Contributions

	Forecast Actual 2023/24 \$'000	Budget 2024/25 \$'000	Change	
			\$'000	%
Monetary	3,017	4,811	1,794	59.46%
Non-monetary	7,316	7,163	(153)	(2.09%)
<b>Total contributions</b>	10,333	11,974	1,641	15.88%

Contributions represent funds received by Council, usually from non-government sources, and are usually linked to projects. Contributions can be made to Council in the form of either cash payments or assets handed over to council from developers.

Examples of Contributions include:

- Monies collected from developers under planning and development agreements
- Monies collected under developer contribution plans and infrastructure contribution plans
- Contributions from user groups towards upgrade of facilities
- Assets handed over to Council from developers at the completion of a subdivision, such as roads, drainage, and streetlights.

Contributions should always be linked to a planning or funding agreement. Council will not undertake any work on a contribution-funded project until a signed agreement outlining the contribution details is in place.

Contributions linked to developments can be received well before any Council expenditure occurs. In this situation, the funds will be identified and held separately for the specific works identified in the agreements.

Contributions are projected to increase by \$1.64 million or 15.88 percent compared to 2023/24.

## 12.5 Other income

	Forecast Actual 2023/24 \$'000	Budget 2024/25 \$'000	Change	
			\$'000	%
Interest	2,253	2,100	(153)	(6.79%)
Other Rent	285	252	(33)	(11.58%)
Other	572	420	(152)	(26.57%)
<b>Total other income</b>	<b>3,110</b>	<b>2,772</b>	<b>(338)</b>	<b>(10.87%)</b>

Other income mainly comprises interest revenue from investments plus rent received from commercial tenants. In addition, Council received ad hoc receipts that are classified as other.

## 13. Appendix A

### **Pensioner rebates**

Holders of a Centrelink or Veteran Affairs Pension Concession card or a Veteran Affairs Gold card which stipulates TPI or War Widow may claim a rebate on their sole or principal place of residence. Upon initial application, ongoing eligibility is maintained, unless rejected by Centrelink or the Department of Veteran Affairs during the annual verification procedure. Upon confirmation of an eligible pensioner concession status, the pensioner rebate is deducted from the rate account before payment is required by the ratepayer.

With regards to new applicants, after being granted a Pensioner Concession Card (PCC), pensioners can then apply for the rebate at any time throughout the rating year. Retrospective claims up to a maximum of one previous financial year can be approved by Council on verification of eligibility criteria, for periods prior to this claim may be approved by the relevant government department.

### **Deferred payments**

Under Section 170 of the Local Government Act 1989, Council may defer the payment of any rate or charge for an eligible ratepayer whose property is their sole place of residency, allowing ratepayers an extended period of time to make payments or alternatively to forestall payments on an indefinite basis until the ratepayer ceases to own or occupy the land in respect of which rates and charges are to be levied. Deferral of rates and charges are available to all ratepayers who satisfy the eligibility criteria and have proven financial difficulties. Where Council approves an application for deferral of rates or charges, interest will continue to be levied on the outstanding balance of rates and charges but at an interest rate fixed annually by Council. Ratepayers seeking to apply for such provision will be required to submit a Rates Deferment Application form which is available at the council offices, on the Council website or which can be posted upon request.

### **Rates Hardship Policy**

It is acknowledged at the outset that various ratepayers may experience financial hardship for a whole range of issues and that meeting rate obligations constitutes just one element of several difficulties that may be faced. The purpose of the Hardship Policy is to provide options for ratepayers facing such

situations to deal with the situation positively and reduce the strain imposed by financial hardship.

Ratepayers may elect to either negotiate a rate payment plan or apply for a rate deferral. Ratepayers seeking to apply for such provision will be required to submit an application form.

*\*Please note, Council are currently reviewing the financial hardship policy, this will be completed within the 24/25 financial year.*

## **Debt recovery**

Council makes every effort to contact ratepayers at their correct address, however, it is the ratepayers' responsibility to properly advise Council of their contact details. The Local Government Act 1989 Section 230 and 231 requires both the vendor and buyer of property, or their agents (e.g. solicitors and or conveyancers), to notify Council by way of notice of disposition or acquisition of an interest in land. In the event that an account becomes overdue, Council will issue an overdue reminder notice which will include accrued penalty interest. In the event that the account remains unpaid, Council may take legal action without further notice to recover the overdue amount. All fees and court costs incurred will be recoverable from the ratepayer. If an amount payable by way of rates in respect to land has been in arrears for three years or more, Council may take action to sell the property in accordance with the Local Government Act 1989 Section 181.

## **Fire Services Property Levy**

In 2016 the Victorian State Government passed legislation requiring the Fire Services Property Levy to be collected from ratepayers. Previously this was collected through building and property insurance premiums. The Fire Services Property Levy helps fund emergency services and all levies collected by Council are passed through to the State Government. The Fire Services Property Levy is based on two components, a fixed charge, and a variable charge which is linked to the Capital Improved Value of the property. This levy is not included in the rate cap and increases in the levy are at the discretion of the State Government.
