

Accessibility Compliance

Council recognises documents created prior to 31 December 2015 as Legacy Documents with regard to compliance with the Web Content Accessibility Guidelines (WCAG) 2.0, also commonly referred to as AA Accessibility Guidelines.

Whilst every effort has been made to ensure Council's public documents are accessible and compliant with WCAG 2.0, some documents cannot be converted to completely adhere to these guidelines without undue burden. This may include documents that were not created by Council or directly supplied to Council in an electronic format, as well as any documents that are subject to frequent and substantial changes.

However, Council will upon request convert any Legacy Document to comply with WCAG 2.0 standards. In such cases, Council appreciates your patience, as this process can be lengthy depending on the complexity of the document, and may take some time.

To request conversion of a Legacy Document to comply with WCAG 2.0, you can:

- Email bawbaw@bawbawshire.vic.gov.au
- Send an online enquiry at www.bawbawshire.vic.gov.au/contact-us
- Call the Community Information and Service team on 5624 2411
- Visit a Customer Service Centre.

You will need to provide us with the full name and date (if known) of the Legacy Document.

Documents that were created from 1 January 2015 are currently being converted to comply with WCAG 2.0 and will be uploaded in due course.

Additionally, some pages on Council's website include hyperlinks to external/other sites. Council does not accept responsibility or liability for the contents of any information or documents provided by external sites through these links, nor does it assume any legal responsibility for degree of accessibility or the accuracy, completeness, and usefulness of the information in the links.

Mt Worth State Park

Situated on the western rim of the Strzelecki Ranges, Mount Worth State Park features Mountain Ash forest and regenerating native bush. A network of walking tracks radiate from the Moonlight picnic area. Raincoats and boots are a wise precaution as you are in a wet mountain forest with a high average rainfall.

Giant's Circuit

This trail follows the route of a timber tramway through Mountain Ash forest and fern filled gullies. This lovely walk includes the impressive Standing Giant, a huge Mountain Ash with a girth of 7 metres and probably 300 years old.

Maslin's Mill

This track meanders through forest of Mountain Ash and Blackwood to Maslin's Mill site. Suitable for people with limited mobility.

Moonlight Circuit

This is a strenuous walk suitable for more experienced walkers. The track climbs steeply to the ridge through regenerating Mountain Ash forest and a dense understorey of Dogwood, Daisy Bush and Blackwood. The track then follows a trickling mountain stream through lush fern gullies to the sites of old timber mills.

Gardiners Mill Track

This walk is an extension of the Giant Circuit and takes you through regenerating Mountain Ash forest and along the tree-fern lined Clark Creek.

Cycling and horse riding not permitted on walking tracks

Giant's Circuit: 1.8 km - 1 hour Return

Maslin's Mill: 1.6 km - 40 minutes Return

Moonlight Circuit: 8.5 km - 3 hours Return

Gardiners Mill Track: 1.5 km one way - 1 hour Return
